School of Business Administration

**Trimet**

The PSU Business Outreach Program (BOP) and TriMet partnership provides technical assistance and a low-interest loan program to small businesses negatively impacted by light rail construction. The BOP uses its full-time consulting staff, student teams and interns, and other community partnerships to provide these services. All stakeholders have engaged in the success to balance learning, research and service to maximize our community impact. This award will expand our ability to serve students and businesses.
