

Cynthia Gomez

**Community Greenworks**

Community Greenworks develops civic solutions to the green divide by connecting environmental protection to economic prospects. The diversity of the human experience is explored through studying social justice education and environmental justice. Senior Capstone students engage in green sustainable service-learning and scholarship to gain a understanding of vital issues by working closely with community partners to accelerate current gains in creating, fostering, and nurturing eco-connections and green pathways out of poverty for disenfranchised youth.
