Division of Public Administration

Master of Public Administration

Health Sciences

The health sciences concentration is intended for students seeking admission into professional programs in medicine, dentistry, physical therapy, or occupational therapy. It provides students the opportunity to learn health education content and methods while completing specified science prerequisites.

Physical Activity/Exercise

The physical activity/exercise concentration is designed for students with interest in physiological and programmatic aspects of exercise, nutrition, fitness, and physical activity.

The school health concentration is intended for students interested in teaching health education within a public or private school setting. Upon completion of their bachelor's degree, they are eligible to apply to the fifth year Graduate Teacher Education Program (GTEP) in the Graduate School of Education at PSU. After completion of GTEP, they will be certified to teach in the state of Oregon.

In addition to meeting the general University degree requirements, students earning a B.A./B.S. degree in health studies must successfully complete:

- The common degree requirements
- One of the four concentration areas, from which a plan of study is developed with an academic adviser

B.A./B.S. in health studies at Portland State University

The undergraduate program in health studies at Portland State University contains more common core courses with four separate concentrations: community health education, health sciences, physical activity/exercise, and school health.

Community Health

The community health education concentration prepares students for entry-level careers in health education.

Health Sciences

The health sciences concentration is intended for students seeking admission into professional programs in medicine, dentistry, physical therapy, or occupational therapy. It provides students the opportunity to learn health education content and methods while completing specified science prerequisites.

Physical Activity/Exercise

The physical activity/exercise concentration is designed for students with interest in physiological and programmatic aspects of exercise, nutrition, fitness, and physical activity.

The school health concentration is intended for students interested in teaching health education within a public or private school setting. Upon completion of their bachelor's degree, they are eligible to apply to the fifth year Graduate Teacher Education Program (GTEP) in the Graduate School of Education at PSU. After completion of GTEP, they will be certified to teach in the state of Oregon.

In addition to meeting the general University degree requirements, students earning a B.A./B.S. degree in health studies must successfully complete:

- The common degree requirements
- One of the four concentration areas, from which a plan of study is developed with an academic adviser
