2. Percentage Change in Population: 1990 - 1991 22

SUMMARY

This report provides population estimates for Oregon and its counties and cities for the years 1980 through 1991. As mandated by Oregon law, the Center for Population Research and Census at Portland State University, acting on behalf of the State Board of Higher Education, annually estimates the July 1 population for each county and incorporated city in Oregon. These figures must be certified to the Secretary of State by December 15. When certified the population estimates are used in the allocation of certain state tax revenues to cities and counties.

Oregon's estimated July 1, 1991 population is 2,930,000 which represents about 1.2% of the United States population of about 252,177,000. Oregon's population increased 87,679 persons (3.1%) in the 15 months since the last U.S. Decennial Census (April 1, 1990). This rate of increase is substantially higher than the United States' average (1.4%). Oregon's growth rate in the early 1990's is a continuation of the rapid growth experienced in the late 1980's when it grew at twice the national average. In the early and mid 1980's, however, Oregon's population remained relatively stable and the rate of growth since April 1, 1980 is similar for both Oregon and the United States (about 11.5%).

Oregon's population increase of about 87,700 persons since April 1, 1990 is the result of two factors: natural increase (births minus deaths) and net migration (persons moving to Oregon minus persons leaving Oregon). Natural increase has accounted for about 23,000 new Oregonians and there has been a net in-migration of about 64,700 persons in the 1990's.

Figure 1 shows a map of Oregon's July 1, 1991 county population estimates. What is particularly striking about this figure is that the eight most highly populated counties are located on what may be termed the I-5 corridor. These counties (Multnomah, Washington, Clackamas, Marion, Linn, Lane, Douglas, and Jackson) contain 2,084,700 persons or 71 per cent of the state's 1991 population. Another example of the uneven population distribution in Oregon is that although half of Oregon's counties are east of the Cascade Range, these counties contain only 374,900 persons or 12.8% of the state's population.

As in the 1980's, a significant proportion of Oregon's population growth in the early 1990's has occurred in the Portland Metropolitan Area, which is comprised of Multnomah, Washington, Clackamas, and Yamhill Counties. Washington County has recorded the largest increase since April 1, 1990 (+16,946) with the other Portland area counties also experiencing significant growth: Multnomah (+16,113), Clackamas (+9,850), and Yamhill (+2,349). The Portland Metropolitan Area has an estimated 1,285,100 residents, or 44% of the state's population as of July 1, 1991; in 1980, the corresponding figure was 42%.

Population estimates for 1991 show that Multnomah County (600,000) continues to have substantially more persons than any other Oregon county. Washington County is the second most populous county (328,500); Lane County is in third place (290,900) with 2,200 more persons than Clackamas County (288,700).

As in the 1980's, many cities gained new residents because of expanding city boundaries (Table 5). In the previous 15 months, 38 cities annexed land containing 17,358 persons. Portland gained 11,502 residents through annexations and Albany gained 3,866 residents. Other cities that gained more than 100 persons through annexations were Roseburg (+500), Bend (+351), Salem (+261), and Fairview (+187).

Table 4 categorizes Oregon cities by population size. Portland is Oregon's most populous city and its estimated population of 453,065 is about four times the second and third most populous cities: Eugene (117,155) and Salem (110,360). The city of Portland has more persons than any Oregon county with the exception of Multnomah. It is quite clear from Table 4 that Oregon has many small cities. Fewer than one-fourth of Oregon's 241 incorporated cities have 5,000 persons and about 40% of Oregon's cities have a population under 1,000.

Oregon's population is a little older than the national average with a median age of 34.6 years relative to the national average of 32.9 years. Approximately 13.8% of Oregon's population (403,625) is aged 65 and older compared to the national average of 12.6%; in 1980, 11.5% of Oregon's population was elderly (persons aged 65 and older). Oregon's elderly population has grown by 100,000 persons since April 1, 1980, reflecting a growth rate which is triple the overall state average during this time (33% to 11%). The rapid rate of growth among Oregon's elderly population is consistent with the national trend of an ever increasing proportion of elderly.

Although the proportion of elderly in many counties is similar to the state average of 13.8%, eight counties have an elderly population representing at least 18% of their total population: Curry (24.0%), Tillamook (20.9%), Josephine (20.8%), Wheeler (20.6%), Lincoln (20.5%), Gilliam (19.2%), Baker (18.6%), and Sherman (18.0%). Conversely, Benton (9.6%), Washington (10.1%), Clackamas (11.6%), and Morrow (11.9%) have a substantially smaller proportion of elderly than the state average.

Tables 1 through 8 and Figures 1 and 2 provide the reader with a more detailed analysis of Oregon's current population as well as an historical look at its population during the 1980's.
